

Wedge Anchor BZ plus

Steel, zinc plated

Wedge Anchor BZ plus

Description

The Wedge Anchor BZ plus combines high ultimate loads with small anchor spacing and edge distances. The coating of the expansion cone with durable, heat resistant head shrink tube is a patented invention of MKT to prevent cold welding of stainless steel material and provide the right friction between expansion cone and expansion sleeve for the life time of the fixing, not only at the time of installation; a condition for reliable crack-tested anchors. The anchor is shock approved.

Applications

Medium to heavy duty anchorings in cracked and non-cracked concrete: Steel beams, base plates, channels, tracks, wood structures.

Range of concrete quality: C20/25 - C50/60

Software available

Loads and performance data				M8	M10	M12	M16
				cracked concrete C25/30			
Recommended loads, tension	rec. N	[kN]	2.20	4.00	5.30	11.00	
Recommended loads, shear	rec. V	[kN]	4.40	6.96	10.10	18.83	
Recommended bending moments	rec. M	[Nm]	13.10	25.70	45.10	113.70	

Loads and performance data				M8	M10	M12	M16
				non-cracked concrete C25/30			
Recommended loads, tension	rec. N	[kN]	5.33	7.11	8.77	15.44	
Recommended loads, shear	rec. V	[kN]	4.40	6.96	10.10	18.83	
Recommended bending moments	rec. M	[Nm]	13.10	25.70	45.10	113.70	

Installation parameters

Drill hole diameter	d _o	[mm]	8	10	12	16
Diameter of clearance hole in the fixture	d _r	[mm]	9	12	14	18
Depth of drill hole	h ₁	[mm]	60	75	90	110
Effective anchorage depth	h _{ef}	[mm]	46	60	65	85
Minimum thickness of concrete slab	h	[mm]	100	120	130	170
Installation torque	T _{inst}	[Nm]	15	25	45	90
Width across nut	SW	[mm]	13	17	19	24

Wedge Anchor BZ plus

- Steel, zinc plated
- Approved for cracked and non-cracked concrete

Recommended shear loads for single anchor without influence of spacing and edge distance, total safety factor 3. C20/25 up to C50/60 in cracked and non-cracked concrete.

Shear [kN]	Cracked and non-cracked concrete			
	Concrete strength	M8	M10	M12
≥ C20/25	4.40	6.96	10.10	18.83

Installation of MKT BZ Steel Wedge Anchor

1. Drill to specified diameter and depth.
2. Clean the hole with blow-out bulb.
3. Drive anchor carefully with hammer into hole until nut and washer are flush with fixture.
4. Install fixture and tighten anchor to specified torque. If the marking in the threaded part of the anchor bolt becomes visible, do not load anchor. Refer to approvals and schedules for design and building code compliance.
